

Cardboard box project

Step 1: Cut the flaps off a large cardboard box.

Step 2: Using scissors to shape the body of the car. Leave the front of the box for the windscreen.

Step 3: Cut out the windscreen by scoring the scissors over the cardboard or by poking a hole in the middle and cutting the windscreen from the inside out.

Step 4: Cut out the door, score and fold the cardboard to create a hinge. Use cardboard plates to make the wheels. If time permits add creative trimmings such as; horn, lights and a steering wheel.
